X Labeled for control. Effectiveness of control is not rated here. Check label for registered pests. Not all products are labeled to control the same pests.

No endorsement of named products by the author or publisher is intended nor is criticism implied for products not mentioned. Insecticide/fertilizer combinations are not included.

<sup>&</sup>lt;sup>2</sup> Label or specific use approved only in selected states.

<sup>&</sup>lt;sup>3</sup> Biological insecticides include materials derived from plants, animals, bacteria, fungi and other living organisms.

<sup>&</sup>lt;sup>4</sup> Restricted-use pesticide. This designation may apply to the product generally or only to certain sites, states or specified uses. Consult the label.

## INSECTICIDES AND THE INSECTS THEY CONTROL

	Insects Controlled																																		
European chafer (adult)	European cranefly	Fall armyworm <sup>8</sup>	Fire ant	Firebrat	Fleas	Formula grass mite	Frit fly	Fruit fly	Gnat	Grasshopper	Greenbug	Green June beetle (adult)	Ground beetles (adult)	Ground pearls	Japanese beetle (adult)	June beetle (adult)	Leafhopper	Lucerne moth	Millipede	Mirid bug	Mole cricket	Mosquito	Nematodes	Rhodesgrass scale	Scorpion	Skippers	Sod webworm	Sowbug	Spiders	Spittlebug	Springtail	Ticks	Turfgrass weevil (Hyperodes)	White grubs <sup>5</sup>	Winter grain mite

<sup>&</sup>lt;sup>5</sup> May include: Annual white grub, Aphodius, Asiatic garden beetle, black turfgrass ataenius, European chafer, green June beetle, Japanese beetle, May/June beetle, Northern masked chafer, Oriental beetle or Southern masked chafer.

<sup>&</sup>lt;sup>6</sup> Labeled for, or controls, only selected species.

 $<sup>^{7}</sup>$  Labeled for control of larvae, not adults.

<sup>&</sup>lt;sup>8</sup> Some labels list specific billbug and armyworm species; others list them in general.

<sup>°</sup> For suppression only.
